APP PORTFOLIO · DESIGNED & BUILT IN-HOUSE

Memento

Keep what matters after the footage ends.

Turns long videos — even 3-hour ones — into actionable Markdown briefs: TL;DR, action items, key facts, and quotes, all with clickable timestamps.

WHAT IT DOES

Any video, any length
Paste a YouTube link or drop in a local file; transcripts are fetched or generated automatically.

Actionable briefs
AI distills the transcript into a brief with a TL;DR, action items, key facts, and caveats.

Clickable timestamps
Every claim links back to the exact moment in the video that supports it.

Ask the video questions
A chat bubble answers questions grounded in the transcript; pin answers into the brief.

A searchable archive
Briefs save as clean Markdown with metadata — a growing library your tools can read.

UNDER THE HOOD

Electron · Whisper transcription · GPT summarization · Markdown + YAML output

PRIVACY STANCE

Your archive is plain local files — portable, greppable, never locked in.

Want an app like this for your business?
We design and build native apps end to end — and we'll pressure-test your idea free.
