APP PORTFOLIO · DESIGNED & BUILT IN-HOUSE

Political Watch

What the federal government actually did today.

A dashboard for Congress, the Supreme Court, and the executive branch — with an AI analyst that writes a plain-English cross-branch briefing on launch.

WHAT IT DOES

All three branches
Bills with recent action, issued opinions and orders, presidential documents and significant rules — filtered to what matters.

The Briefing
A plain-English synthesis across branches, written fresh from the live feeds every session.

Explain this
One click turns any bill, opinion, or order into a jargon-free explanation.

Ask the analyst
A docked Q&A box grounded in the current feed — nonpartisan by design.

Session-only
No database, no files written; everything vanishes when you quit.

UNDER THE HOOD

Native macOS app · Official government data feeds · AI synthesis layer

PRIVACY STANCE

Session-only: nothing is stored, tracked, or retained between launches.

Want an app like this for your business?

We design and build native apps end to end — and we'll pressure-test your idea free.
