APP PORTFOLIO · DESIGNED & BUILT IN-HOUSE

Vantage

A cockpit for your life's data.

A local-first macOS 'life cockpit': fast manual capture, durable personal telemetry, evidence-linked analysis, and a suite of live instruments called Horizon.

WHAT IT DOES

Fast capture
Log anything in plain language — parsed into structured, queryable personal records.

Evidence-linked analysis
Trends and insights always trace back to the underlying entries that produced them.

Optional AI layer
AI reasoning is a bounded, opt-in layer — never a requirement, never a data leak.

Durable telemetry
Every entry lands in a local SQLite store you own outright — exportable, inspectable, yours.

Horizon instruments
Live consoles — Radio, Forecast, Record Room, Overhead, Sea State — surround your data with real-world context.

UNDER THE HOOD

Swift · SwiftUI · SQLite · Native macOS app

PRIVACY STANCE

Local-first by design: personal telemetry never leaves your Mac.

Want an app like this for your business?
We design and build native apps end to end — and we'll pressure-test your idea free.
