APP PORTFOLIO · DESIGNED & BUILT IN-HOUSE

Where Did I Park?

One tap when you park. Zero panic when you return.

A privacy-first parking companion. Save your spot in one tap, photograph the pillar sign, set a meter timer — then walk straight back to the car.

WHAT IT DOES

One-tap spot save
Location is read once when you tap Park Here — never tracked in the background.

Smart meter timers
Enter time either way you think — '1 hour 30 left' or 'runs out at 5:30' — with escalating reminders before expiry.

Walk back in Maps
Hands your saved coordinate to Apple Maps walking directions.

Landmark photos
Up to four photos ('pillar 2C', the level sign) find the car when GPS can only find the building.

Sign scanning
Photograph the parking sign; on-device OCR reads '2 HOUR PARKING' and suggests the matching timer.

UNDER THE HOOD

SwiftUI · Apple Vision on-device OCR · Core Location · Local notifications

PRIVACY STANCE

No account, no server, no analytics. Everything stays on the iPhone.

Want an app like this for your business?

We design and build native apps end to end — and we'll pressure-test your idea free.
